

Claytonia virginica

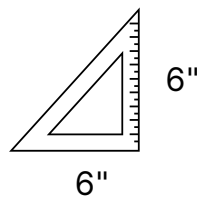

Spring Beauty

Spring ephemeral native to moist woodland areas in the Mid-Atlantic. This plant prefers to live under deciduous trees in moist rich humusy soils with good drainage.

Wildlife Value: Important plant for native specialist bee: *Andrena erigeniae*, aka Spring Beauty Adrena. Attracts beneficial insects.

DEER RESISTANT

Did you know?

The pink lines on the flowers act as guides to steer pollinators to the center of the flower.
